<b>Complete Sex Hormones (without cortisol metabolites)</b> For Men & Women – not beneficial if on the contraceptive pill, ring or implant. Some medications to be checked also prior to testing.	\$295.00 incl GST (Test Only)
<b>Offers the most extensive profile of sex hormones, along with their all-important metabolites.</b> <b>INCLUDES:</b> <u>Urine:</u> Progesterone (2), Androgen (8), Estrogen Metabolites (8) <b>SPECIMEN:</b> 4 x urine cards	

D.U.T.C.H. PLUS (Face-To-Face / Zoom Call)	PRICE
<b>Complete + Cortisol Awakening Response (CAR)</b> For Men & Women – not beneficial if on the contraceptive pill, ring or implant. Some medications to be checked also prior to testing.	\$475.50 incl GST (Test Only)
<b>The DUTCH Plus™ combines the DUTCH Complete test (as above) and additionally includes</b> the Cortisol Awakening Response (CAR) to bring another important piece of the HPA axis (Hypothalamus-Pituitary-Adrenal) into focus. The rise and fall of CAR (at waking, and then 30 and 60 minutes after) can be used as a “mini stress test”. The size of this increase correlates with HPA-axis function. The test helps reveal if the HPA-axis is appropriately responding when faced with a stressor (even when cortisol levels are correct during the day). <b>INCLUDES:</b> <u>Urine:</u> Cortisol (4), Cortisol Metabolites (3), Creatine (4), Melatonin (60HMS), Progesterone (2), Androgen (8), Estrogen Metabolites (8), 8-OHdG, Neurotransmitter Metabolites (3), Nutritional Organic Acids (Vitamin B12, B6, Glutathione). <u>Saliva:</u> Cortisol (5), Cortisone (5). <b>SPECIMEN:</b> 4 x urine cards, 5 x Saliva	

D.U.T.C.H. ADRENAL (Face-To-Face / Zoom Call)	PRICE
<b>Free Cortisol and Cortisol Metabolites</b> For Men & Women (including if on birth control)	\$295.00 incl GST (Test Only)
<b>The DUTCH Adrenal tests for ‘free cortisol’ (bioavailable cortisol) AND the amount of ‘cortisol metabolites’ (how much cortisol the adrenal glands are producing).</b> Some people can present with low free cortisol and high cortisol metabolites which means their production is high. However, the clearance of cortisol may be up-regulated making the free cortisol levels go down. <u>Both measurements are required to show total cortisol production.</u> Cortisol metabolites represent 80% of total cortisol production. This test also measures DHEA-5 (an adrenal gland hormone that helps produce testosterone and estrogen). <b>INCLUDES:</b> <u>Urine:</u> Cortisol (4), Cortisol Metabolites (3), Creatine (4), DHEA-5 <b>SPECIMEN:</b> 4 x urine cards
