D.U.T.C.H. PLUS (Face-To-Face / Zoom Call)	PRICE
Complete + Cortisol Awakening Response (CAR) For Men & Women – not beneficial if on the contraceptive pill, ring or implant. Some medications to be checked also prior to testing.	\$720 incl GST
The DUTCH Plus™ combines the DUTCH Complete test (as above) and additionally includes the Cortisol Awakening Response (CAR) to bring another important piece of the HPA axis (Hypothalamus-Pituitary-Adrenal) into focus. The rise and fall of CAR (at waking, and then 30 and 60 minutes after) can be used as a “mini stress test”. The size of this increase correlates with HPA-axis function. The test helps reveal if the HPA-axis is appropriately responding when faced with a stressor (even when cortisol levels are correct during the day). INCLUDES: <u>Urine:</u> Cortisol (4), Cortisol Metabolites (3), Creatine (4), Melatonin (60HMS), Progesterone (2), Androgen (8), Estrogen Metabolites (8), 8-OHdG, Neurotransmitter Metabolites (3), Nutritional Organic Acids (Vitamin B12, B6, Glutathione). <u>Saliva:</u> Cortisol (5), Cortisone (5). SPECIMEN: 4 x urine cards, 5 x Saliva	

D.U.T.C.H. ADRENAL (Face-To-Face / Zoom Call)	PRICE
Free Cortisol and Cortisol Metabolites For Men & Women (including if on birth control)	\$350 incl GST
The DUTCH Adrenal tests for ‘free cortisol’ (bioavailable cortisol) AND the amount of ‘cortisol metabolites’ (how much cortisol the adrenal glands are producing). Some people can present with low free cortisol and high cortisol metabolites which means their production is high. However, the clearance of cortisol may be up-regulated making the free cortisol levels go down. <u>Both measurements are required to show total cortisol production.</u> Cortisol metabolites represent 80% of total cortisol production. This test also measures DHEA-5 (an adrenal gland hormone that helps produce testosterone and estrogen). INCLUDES: <u>Urine:</u> Cortisol (4), Cortisol Metabolites (3), Creatine (4), DHEA-5 SPECIMEN: 4 x urine cards
